

# User Analysis of AUMS

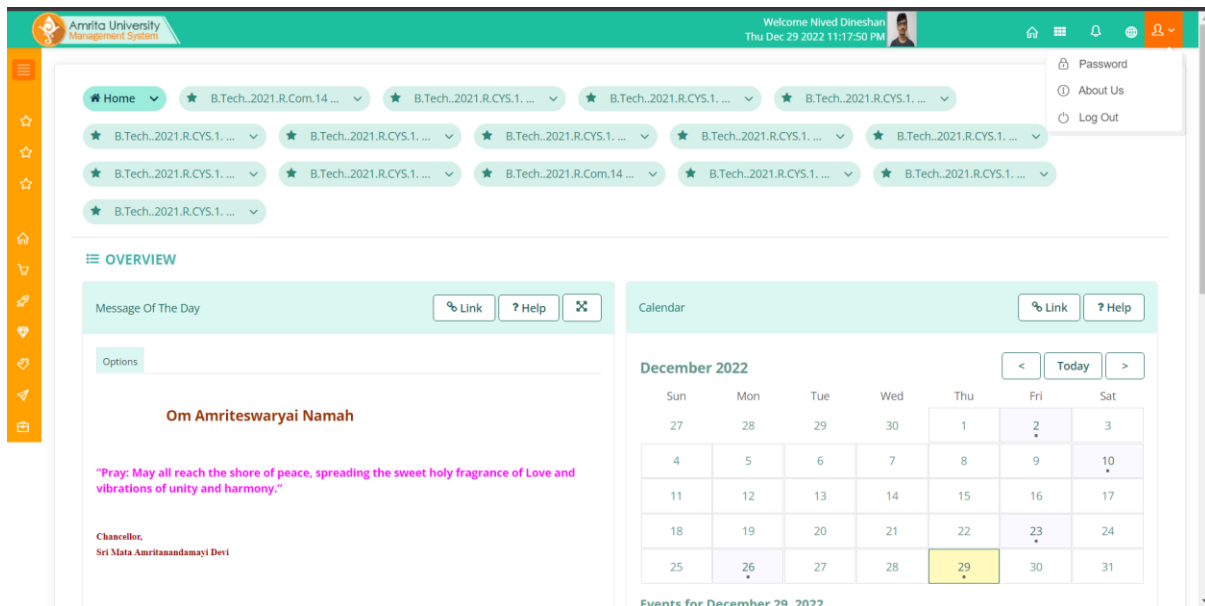

It is a login page for the Amrita University Management System (AUMS). AUMS is a web-based application that is used by students, faculty, and staff at Amrita University to access a variety of online resources and services. These resources and services may include course materials, grades, schedules, transcripts, and other academic information, as well as administrative and financial information.

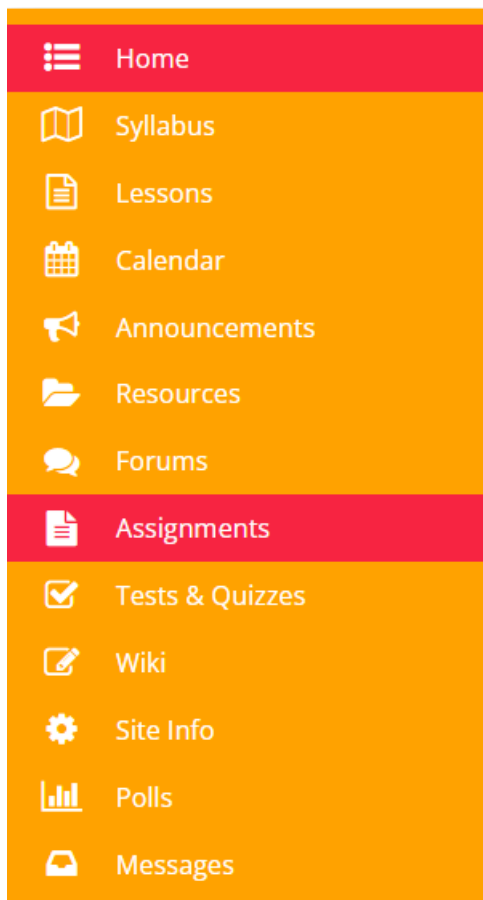

To use AUMS, users must first log in using their Amrita University username and password. Once logged in, users will be able to access the various resources and services available through the application. For example, students may be able to view their grades, schedules, and transcripts, while faculty and staff may be able to access information about courses, students, and other administrative tasks.

One of the key features of AUMS is its use of a single sign-on (SSO) system, which allows users to access multiple resources and services with a single login. This means that once users have logged in to AUMS, they do not need to log in again to access other services or resources within the application.

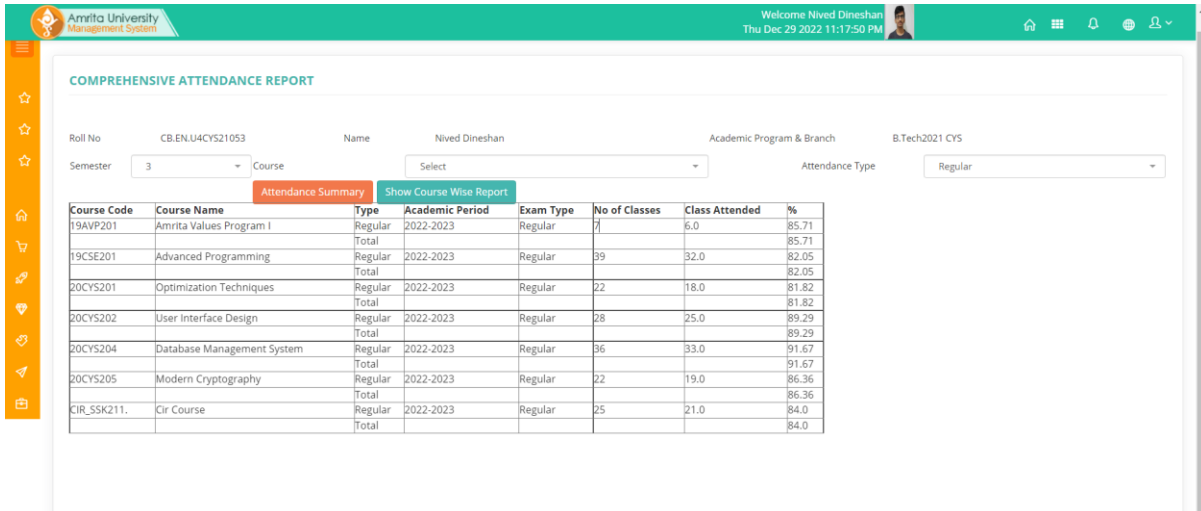

In addition to the main AUMS application, there are also a number of other applications and services that are integrated with AUMS. These include the Amrita University email system, library services, and other online resources and tools.

AUMS is a web-based application that is accessible from any device with an internet connection. This means that users can access AUMS from their computers, tablets, or smartphones, allowing them to stay connected to their academic and administrative information even when they are on the go.

AUMS is designed to be user-friendly and easy to navigate. It has a clean, modern interface that is organized into a series of tabs and menus, making it easy for users to find the information they are looking for.

### Welcome to the Wiki Tool

**What is a wiki?**

A wiki is a tool which allows people to create web pages individually or as a group, without needing any web skills. Using the wiki tool, you can create and edit web pages within your worksite. If you wish, you can make all or some pages publicly viewable.

**Using wikis for teaching**

There are a wide number of ways to use wikis for teaching - a web search will find any number of suggestions and case studies. For example, students can develop a collection of resources about the topic they are studying, and make them available to the outside world. Other lecturers like to produce a wiki page as a way of publishing lecture notes and course guidance for students to read but not edit.

**Using wikis for research groups**

A wiki allows people to work on producing a document together, such as to draft research proposals as a team, or to keep an up to date list of project contacts.

**How do we get started?**

This is the home page for your wiki. To add text to it:

- Click the 'edit' button in the actions bar above.
- You will see the text on this page appear in an editable text box.
- Delete this "starter" text, and type in the text that you want to appear instead. To format the text, use the button icons, which will insert the appropriate wiki formatting codes.
- Click the 'save' button.

AUMS is supported by a team of IT professionals at Amrita University. If users have questions or encounter any issues while using AUMS, they can reach out to the IT support team for assistance.

Overall, AUMS is an important resource for the Amrita University community, providing a central location for accessing a wide range of information and services related to their academic and administrative needs. It is designed to be user-friendly, secure, and constantly updated with new features and improvements, making it an essential tool for managing the day-to-day operations of the university.

The screenshot displays the Amrita University Management System (AUMS) interface. At the top, a green header bar contains the Amrita University logo on the left, a welcome message "Welcome Nived Dineshan" and the date "Thu Dec 29 2022 11:26:27 PM" in the center, and navigation icons on the right. Below the header, the main content area is titled "Calendar by Week". It includes a "Printable Version" link and a "View" dropdown menu set to "Calendar by Week". A "Set as Default View" button is also present. The calendar grid shows the week from Sunday, December 25, 2022, to Saturday, December 31, 2022. The current day, Thursday, December 29, is highlighted in yellow. The grid displays time slots from 8 AM to 4 PM. A sidebar on the left contains icons for various system functions.
